-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 06 December 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.

**DETAILED ACTION**

1. This communication is responsive to preliminary amendment filed 12/6/05.

Claims 1-11 are currently pending in this application. Claim 12 has been cancelled.

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buess et al. P.N. 5,206,592 (Buess) in view of Kim et al. P.N. 6,2,994 (Kim).

Art Unit: 2859

Buess discloses a NQR system for explosives detection. Applicant's attention is directed to col. 5, lines 35-39 which describe the use of a multiply-tuned T/R system for simultaneous detection at multiple frequencies.

The only difference between Buess and the claims at issue is that Buess is silent about the passive circuit protection recited by the claims. This difference however, would have been obvious to the artisan of ordinary skill in the art in view of Kim. Kim discloses a reception circuit for NQR or NMR. Applicant's attention is directed to Fig. 1 and corresponding description. As described for example in lines 22-31 of col. 12 passive protection circuits are used in the form of crossed diodes 38 and/or the quarter wave line depicted in Fig. 1. Note also the description of stage reception for multiple frequencies as described in connection with Fig. 13A and 13B. To use the manifest advantages of Kim's passive protection circuits in a multiple tuned NQR system such as Buess', would have been obvious to the artisan of ordinary skill in the art and would result in the invention as is currently claimed.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rudakov et al. discloses a NQR system. Note the use of multiple frequencies.
